

AUVANCE

VANCOUVER WEB STUDIO

Business Playbook

Vision, positioning, pricing & the 90-day plan

Vision & Mission

Vision. Become the go-to studio for Vancouver local businesses that want a website which actually brings customers — built by one person who both designs and ships, with none of the agency runaround.

Mission. Give local businesses a fast, premium, conversion-focused website they fully own — at an honest flat price, delivered in about three weeks, with a real person they can text.

THE ONE-SENTENCE OFFER

“I build local Vancouver businesses a fast, custom website that turns visitors into customers — designed and shipped by one person in ~3 weeks, and you own all of it.”

Core Values

- **Design and build — no handoff gap.** What ships is what was designed; nothing lost in translation.
- **Clarity over clever.** Fast, legible, one obvious next step on every screen.
- **You own everything.** Domain, hosting, code — no platform lock-in, ever.
- **A real person, not a ticket queue.** You talk to me directly, start to finish.
- **Proof, price, process.** Credibility comes from these three — never from being cheap.

Positioning & Niche

Primary market: local Vancouver small businesses — trades & home services, clinics, salons, restaurants/cafes, and community organisations. People who are good at their craft but invisible (or embarrassing) online.

Beachhead: start where you already have warmth and a first reference — the faith/community network (Abu Bakr Siddiq) and trades (your cousin's lawn-care site is your way into home services, where owners all know each other and referrals compound).

The wedge: most providers are either developers who can't make it look good, or designers who can't ship. You do both — that's the whole pitch.

The Launch Site

One core product, sold flat. No confusing tiers — just the build, plus only what a client actually needs.

Included in every build	
Custom, hand-built site (up to 5 pages)	Live in ~3 weeks
Mobile-first, fast, accessible	You approve every stage
Google Business Profile + local SEO basics	Up to 2 revision rounds
You own the domain, hosting & code	50% deposit to start
A real person — not a ticket queue	Final 50% before launch

Add-ons (same flat, upfront pricing):

Add-on	Price
Copywriting — I write your site content	+\$300
Extra pages — beyond the core set	+\$150 / page
Online store / booking	+\$600
Care plan — hosting, updates & edits	+\$75 / month

The Pricing Ladder

Price rises with proof. The number never drops — cheap is not credible, and price is itself a trust signal.

Phase	What you charge	When
0 — Credibility (now)	Free — “paid” in testimonial + showcase rights + 2 referrals	2 builds only: Abu Bakr Siddiq (done) + cousin's lawn-care
1 — Founding rate	CA\$1,500 flat	Your first ~3 paid clients
2 — Standard	CA\$2,000 – 2,500	After 3 paid clients & real results

THE RULES (so the ladder actually works)

1) **Cap the freebies at two.** The very next site after your cousin is paid — no “just one more.” 2) Even free work gets a **signed 1-page scope** and the trade (testimonial + showcase + referrals). 3) Raise the price **by count** (after N clients), and don't publish the future number. 4) Payment is **50% deposit / 50% before launch** — never installments, never release files before final payment.

Recurring revenue: after launch, offer the **\$75/mo care plan** (hosting, edits, a monthly report). This is the compounding part of the business — it's switch-off-able if they stop paying, unlike financing a build.

The Sales System

The binding constraint at your stage is **trust, not sales technique**. You don't need to be a master closer — you need warmth, proof, and a clean process.

The funnel (keep it to 5 steps):

- **Form / referral** → auto-reply instantly, then you personally reply within a few hours.
- **Discovery call** (15 min, video or in-person) — run it as a *diagnosis*, not a pitch. Listen 70%.
- **1-page proposal** within 24h — their goal, scope, \$1,500, timeline, terms.
- **Close** — signed agreement + 50% deposit books their start date.
- **Onboard** → **build** → **launch** → then ask for the testimonial + 2 referrals, and offer the care plan.

Where to find them (in order):

- **Warm first.** Message ~20 people you know; ask for *referrals*, not the sale. Mosque + cousin networks are referral nodes.
- **Demonstrate, don't persuade.** Build a free partial mockup of *their* homepage before you reach out — it collapses the trust gap with zero sales skill.
- **Niche down.** “I build sites for [trades / clinics]” — referrals compound inside one industry.
- **Cold local walk-ins are the week-6 move**, not week one.

First 90 Days

Window	Focus	Done =
Days 1–14	Lock proof + process	Mosque testimonial collected; cousin's site built + testimonial; 2 case studies live; onboarding pack ready; site deployed
Days 15–45	Outreach	20 warm messages + ~10 local businesses/week; goal: first paid “yes” at \$1,500
Days 45–90	Deliver & raise	Deliver first 1–3 paid builds; collect testimonials; pitch care plans; raise standard rate toward \$2,000

The one number that matters: first paid “yes.” Everything else is downstream of it.

Operating Principles

- **Credibility = proof + price + process.** Build proof (freebies), hold the price (\$1,500+), run the process (contract + deposit).
- **The Abwab lesson:** a project blew up because there was no signed scope. **Never start work without a signed agreement + deposit** — even for a freebie.
- **Underpricing is the bigger risk** than overpricing. Cheap clients argue most.
- **Studying sales ≠ doing sales.** Send the message. The first yes is a person, not a price.
